

Invitation for a Free Trial of the Danielcode trade signals, our new Trade Program and Live Trade Room

We have added a number of new features to the Danielcode website in recent months, all designed to make your trading safer and easier, and to help you understand what is usually a complex and daunting subject. I believe with the new tools that we have available, we can show you a simple and methodical way to either start on the path of trading financial markets, or if you are an established trader, to take your trading to the next level. I cover a wide range of markets including S&P, Dow, Germany's DAX, the Australian SPI and other indices; GOLD and Silver, US T Bonds and Oil and 16 Forex pairs as well as some Grains. You will find the markets that interest you here.

We have found that many do not have the time or inclination to learn the various trading protocols that traders have traditionally needed, so we are using a combination of technology and personal advice to get you started on the trading path and hopefully hold your interest.

To start your 31 day free trial of the Danielcode, you simply need to click on the "Register" link below; complete the simple registration form and insert the code "dc" without the quote signs into the Promo Code Box. That will give you instant access to everything at the DC website. The simple version that I suggest to get you started is as follows:

1) Start with the **T.03 and PLUS trade signals** posted for members about 2 hours after the US close each trading day. These signals are posted in the T.03 PLUS tab. We have now completed 7 months of testing of these signals, and Dave Hunt's independent analysis has scored **65 winning trades or 90% strike rate for the DC signals in forex and futures for June 2010, and 592 or 86% winning trades from 12/01/09 to end of June 2010**. Full details are posted on the NEWS page if you would like more information.

2) The trades for each day are transferred from the T.03 and PLUS signals pages into the **DC Trade Program** (under its own tab) where they are adjusted for market correlations, trade account balance and the desired risk. The program displays exact entry, initial stop and 1st target numbers. You need only type in your real or practice account balance and desired risk on entry (we recommend not more than 2%) and the program will calculate the correct number of contracts adjusted for market correlations that match your risk parameter.

3) Next step is the new **Live Trade Room** where Dave Hunt will take them through the trade signals for the day, qualify the trades, and suggest the best stop loss strategy for each trade. Once you have registered for your free trial, you will be able to logon to the DC website and a new tab for our Live Trade Room will be displayed. Click on that tab and register instantly for access to the Trade Room. Dave will be there to answer all of your questions for 45 minutes either side of the European open and most of the day while US markets are trading.

Dave will show you the logic of the order flow, mandatory stop and reverse etc., and the Trade Programs risk management rules.

4) You will find the DC trade signals easier to follow if you have **Trade Navigator charts**. Click on the Trade Navigator logo at the right of this page to request a 31 day free trial of the TN charting software and data. Email radcock@TradeNavigator.com if you have any problems. With that free trial, TN will also provide you with the Danielcode Trade Library with our useful features and studies.

It seems to me that in this way we go from a high probability trade signal creation, all the way through to placing the orders and guiding you on trade management.

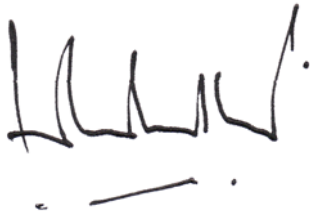

5) At the members' **Forum**, you will find almost every question that you can think of about trading. There is a keyword search facility to search those answers and you will find a number of experienced DC traders in the Forum who are happy to answer your questions and help you in any way.

6) You will find the **DC Trading Manual and a large number of instructional webinars and videos** in this website. If we can get you off to a good start with a high degree of interest, I hope that many of you will take the time to learn the art of trading over time. I assure you that it is a worthwhile goal.

What I ask in particular is that you do NOT risk any real money while you are learning how to trade. Our Brokers, Striker Securities (email jwinter@striker.com) or the folks at Trade Navigator (www.genesisft.com) will be happy to set you up with free practice accounts in futures and forex. Use these until you are confident that you can match our proven strike rate and control the risk on your trades.

Trading is a high risk business and it is easy to lose money until you understand all that you need to know.

I want you to enjoy your trial and hope that the wonderful world of trading markets captures your interest.
