

The \$50K Trading system Report

\$50,000 Portfolio (Hypothetical Results)

This model simulated account was traded using the Daily Signals generated by the **Daniel Code Trade Program** (no blue line or T-3 carry over trades were taken). It followed the Forex signals with a risk of 1% per trade. The exit strategy took profits on ½ of the position at the First Target, and exited any remaining position on the First Profitable Close. The initial Reversal Stop was replaced with a Trailing Stop (240 bar) once Profit Target was elected or the position was not profitable after the close of the initial trading session.

THE RISK OF LOSS IN TRADING COMMODITY FUTURES AND OPTIONS CAN BE SUBSTANTIAL AND MAY NOT BE SUITABLE FOR ALL INVESTORS. Prior to purchasing a trading system from this or any other system vendor or investing in a trading system with a registered commodity trading representative, investors need to carefully consider whether such trading is suitable for them in light of their own specific financial condition. It may be necessary for accounts subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets. In addition, one should carefully study the accompanying prospectus, account forms, disclosure documents and/or risk disclosure statements required by the CFTC or NFA, which are provided directly by the system vendor and/or CTA's.
